

RETRIEVABLE BRIDGE PLUGS

Jabertech Company

Jabertech specializes in downhole pressure and temperature gauges, High expansion gauge hangers, High expansion retrievable bridge plug. The company established in 2007 with the vision of providing data quality and to be the first company making data collecting tools in the MENA region.

Applications

- Well bore isolation as a mechanical barrier for pressure control.
- Pressure control for snubbing operations or wellhead changeovers.
- Sour gas or CO2 zone suppression.
- Offshore collision control
- Zone isolation for water / CO2 / H2S shut off using straddle equipment and the large thru-bore of the QUP to maintain production.

Features

- ❖ Deployed By Slickline or Coil tubing
- ❖ Set using an Electric Setting Tool.
- ❖ Suitable for sour gas environments
- ❖ Standard High Temperature rating (300F/150C in HSN & 400F/200C in Viton)
- ❖ Size to allow travel through restrictions and landing nipples
- ❖ Pump Through option available with check valves
- ❖ Straddle system available for zone isolation

Specifications

Nominal Size	Plug OD	Setting Range	Pressure Rating (PSI)
3 1/2"	2.720"	2.72" - 3.050"	10,000
4 1/2"	3.670"	3.670" - 3.940"	10,000
5 1/2"	4.50"	4.54" - 5.14"	10,000
